

Recycled Paper Ball Ornament Craft

Cut a bunch of 3 inch strips off the calendar picture. You can either keep them in order (so the ball has a distinct picture on it), or you can mix them up.

Take 5 or so and punch them with the hole-punch on both ends like the picture above. Then, still holding them in your hand, put the brad, but do not butterfly. Do the same with the remaining paper strips until you have a little stack with brads at both ends. When you have quite a few, then butterfly the brad so they stay secure.

Slowly spread them out, like so:

Arrange them how you want being careful not to rip the strips.
