

Waste Reduction Solutions

Waste Tracking

Central Vermont Solid Waste Management appreciates your participation in this effort. By tracking your waste you are helping us to gather data reflecting waste generation rates by businesses and institutions in Vermont. This data will help us understand the nature of the waste businesses are producing and assist in reducing waste over the long term.

Tracking your Waste: Let us know what size collection container or bag gets used for each waste stream. Then, simply put a tick mark in the table below each time the container is full and taken outside for disposal. Thank you!

Size of your collection container or bag for each stream:
